

SPT Pediatric Symptom Checklist (PSC) Pre-Post Test Instructions

Here are the steps for the study.

1. Informed Consent for parents to sign.

- a. Every parent/guardian will need to sign an informed consent form. It is giving permission to be involved in the research study. You can add your name to the last paragraph after “your therapist”, if you would like.
- b. If you have already had a parent/guardian fill out the PSC, can want that data to be included, you can still have the parents sign an informed consent. Basically, we just need proof of their permission.

2. For the Pre-Post Test Survey

- a. Extra info needed- All of this information included on document titled *PCS client data sheet*.
 - Client ID- your initials _ client’s initials. Ex) SJ_JW
 - Sex of child
 - Race/ethnicity
 - Primary Language
 - Dx
 - Age of child
 - Who filled out survey
 - At what # session pre survey was collected
 - At what # session post survey was collected

1. Please try to collect data between session 20-30.

3. Google spreadsheet for collected data responses.

- a. Once you have data, each therapist will enter it into a Google spreadsheet. There are three tabs.
 - 1.Code Sheet- this gives information about how things are coded.
 - 2.Pre PSC Data- this will collect the Pre data
 - 3.Post PSC Data- this will collect the Post data.
- b. You will also need to submit a copy of the informed consent so I suggest you just keep them in a folder until you are ready to scan and submit.
