

## Vision Worksheet

**Use this worksheet to help you gain clarity about your vision. If you are unclear about your vision, spend more time on questions #1-3 while asking yourself, "What am I here to do?" Keep asking until you know. \*It is often our fears and subordinations to outside authorities that keep us from being able to see the vision in our hearts**

1. What would I do/be/create if I knew that I could not fail?
2. If I could achieve or succeed in any career/area of service, what would I love to be known for?
3. What is unique about me? List 10 things.

Once you decide on your vision:

4. What is the problem I want to solve?
5. How do I want to solve this problem (ie. what service or product do I want to create)?
6. Who will I offer my service or product to?
7. When do I want to solve this problem (ie. offer my service or product)?
8. Where do I want to solve this problem (i.e. offer my service or product)?
9. Why do I want to solve this problem? \*Your why is likely connected to a struggle that you have had to overcome and is the most important question to answer of them all!
10. Spend time visualizing yourself creating your vision and the vision itself materialized. How many details can you see in your mind's eye?
11. Write or draw your vision with as many details as possible (This is important!)
