

Intro Course Content to Focus on During Group Consultation

The Synergetic Play Therapy® Intro Consultant’s Role is to highlight and ensure understanding of the following principles, as taught by Lisa. It is important that students learn the principles based upon how they are introduced within this introductory course maintaining the original language, message and description of the principles. The consultant will support fidelity to SPT.

Students moving on to Certification will be responsible for knowing the focus topics outlined for each group consultation.

Intro Consultants should prioritize helping students feel special, competent, and connected to SPT. This can be done by celebrating growth, acknowledging courage, and highlighting each time they try something new. The more stories that consultants share regarding their own experience in SPT learning and SPT Certification, the better the marketing and natural encouragement for students to pursue Certification.

It is encouraged that the first 10 min of each group be dedicated to discussing and exploring the main focus for the month’s consultation.

Reminder: Tracking on the Therapeutic Stages, Emotional Age, Sand, Art, and Partnering with Caregivers are all only briefly introduced in the Intro to SPT course. If students want more, consultants are encouraged to acknowledge this and to let them know they are main focal points in Certification.
